EDUCATION

The University of Chicago Chicago, Illinois

Major in Computer Science, specialization in Machine Learning (B.S.) & Computational and Applied Mathematics (B.S.) Expected, June 2026

GPA: 3.71/4.00

Relevant Coursework: Graduate Speech Technologies, Graduate Machine Learning, Computer Vision, Deep Learning, Distributed Systems, Adversarial Machine Learning, Graduate AI Models, Databases, Computer Security, Data Structures and Algorithms, Distributed Systems, Probability, Statistics, Differential Equations, Optimization

Leadership: Filipino Society (Secretary, Treasurer)

EXPERIENCE

Apple Cupertino, California

AI Application Engineering Intern June 2026 – September 2026

- Developing AI agent systems in the software interface for hardware design in Wireless Power

Singapore Institute of Manufacturing Technology Singapore

Machine Learning Intern June 2025 – August 2025

- Designed a forecasting architecture for market price prediction for an end-to-end SAAS product
- Developed time series forecasting models on NHITS and TFT architectures, improved accuracy by 30%
- Finetuned Chronos LLM with Azure ML, reducing pipeline retraining time on new data by 40%

G LNK Chicago, Illinois

Software Engineer Intern December 2024 – March 2025

- Designed a robust CV extraction pipeline with Reducto, reducing customer intake time by 60%
- Implemented hybrid search with text-embedding-3 and ChromaDB, reducing retrieval time by 70%

Argonne National Laboratory Lemont, Illinois

Software Engineer Intern May 2024 – August 2024

- Utilized retrieval augmented generation with AI agents to generate 200+ multiple choice Q&As
- Automated Q&A generation and verification pipeline with over 95% efficacy to train in-house LLM
- Established a tutorial on agent LLMs using AutoGen, LangChain, and Qdrant for over 50+ instructees

PROJECTS

Robust Adversarial Muting Attacks on Whisper

May 2025

- Devised an embedded adversarial audio attack on OpenAI Whisper breaking 95% of transcription tasks

SKILLS

Languages: Python, C, C++, Rust, Go, Bash, Java, R, SQL

Tools: PyTorch, TensorFlow, LangChain, LangGraph, Qdrant, Weaviate, AutoGen, Azure, Azure ML, AWS, Elasticsearch, Docker, Kubernetes, NeuralForecast, StatisticalForecast, scikit-learn, ChromaDB
